There's irony in Starbucks, a supplier of overpriced coffee, choosing Akeelah and Bee for his first foray into movie distribution: It's a familiar but effective prodigy story of deals with characters who won't be caught dead walking into a bourgeois caffeine haven. Even so, Akeelah deserves credit for bringing a new angle to the current spelling bee craze, which still treats these high-pressure competitions as adorable novelties (Spellbound, Broadway's 25th annual Putnam County Spelling Bee) and an excuse for the New Age sludge (Bee Season). Akeelah, by contrast, keenly Knowledge as an escape from self-affirming poverty. With the help of a magistrate professor of English (Fishburne), the 11-year-old heroine (Palmer) persists in her research, shrugging off her discouraging single mother (Basset) and stigmatise white man's words. If he doesn't have one already, the Starbucks soundtrack should add a theme song: It's hard here for a logophile. Although better than it seems, Akeelah is not without its plattitudinous qualities. Part of the excitement of spelling bees is that everyone can strike out, and it's hardly plausible that the finale will satisfy so perfectly the screenwriter's sense of drama. This film, debunking stereotypes, also does not shy away from caricatures, especially in the form of the tyrannical Asian father of one competitor. If only it were more subtle as a Starbucks French roast?-Akeelah would be a relatively guilt-free crowd to please. (Opens Fri.) -Ben Koenigsberg posted: Thursday April 27, 2006 Go to content Go to footer It's something of a coup that Jerry Seinfeld managed to cripple together 90 minutes worth of semi-decent bee jokes for his artistic debut. Alas, this is probably the only notable aspect in this otherwise waxy slab of digitally animated anthropomorphism, which is nothing more than a series of toilet-related sketches with the odd celebrity cameo (doesn't Sting count?) squeezed into the process for adult viewers. Seinfeld lends his shrill but solipsistic 'No Yoik' a stretch to the voice of Barry B Benson, a cheerful honey bee determined to break out of the punchclock tedium of hive life in order to experience the outside world. In doing so, he makes the shocking discovery that people collect and consume honey, which so many of his bee brothers have worked hard to produce. He decides to file a lawsuit against the entire human race. Where a film like Ratatouille had the grace to balance some of its more far-fetched plot shenanigans with surfeit wit and wisdom, The Bee Movie accumulates big asks without stopping to offer a point in it all. Time passes, but unutedly one for little 'uns.
