You can go to the Huion Support website first. Move the pointer to the HUION H420 and then tap the Windows icon next to the driver to download a driver that is compatible with the Windows operating system. Open the downloaded file. Double tap the HUION_H420 of the app. You can then follow the master to install the driver for your Huion H420. Option 2: Update the Huion H420 driver automatically (recommended) If you don't have the time, patience or computer skills to update the Huion H420 driver manually, you can do so automatically with Driver Easy. You don't need to know exactly which system your computer is running, you don't need to risk downloading and installing the wrong driver, and you don't have to worry about making a mistake when installing. Easy driver handles it all. Download and install Driver Easy.Run Driver Easy and click Scan Now. The Easy driver will scan your computer and detect any driver problems. Click Update next to any tagged devices to automatically download the correct version of their drivers, then you can install them manually. Or click Update Everything to automatically download and install them all automatically. (This requires a Pro version - you will be asked to update everything when you click the update. Alternatively, you can follow the steps below to update the Huion H420 driver via Device Manager:On the keyboard, click on the Windows and R logo at the same time to call the Run box. Enter devmgmt.msc and click OK to access the Manager.Expand device and other pointing dialogue devices. Click the right button on the Huion tablet and select the upgrade driver. Click Search automatically for updated driver software. Wait a minute for the process to be completed. Note: If you see something like this: you need to upgrade the Huion H420 driver with option 1 or 2, above. If you have any other suggestions, please feel free to leave a comment below. To improve the performance of our product, sometimes we release a firmware update to help. U U Want to upgrade to the latest equipment? Are you unsure about the hardware version of your own tablet/display? Here's a fool-proof guide for you. This guide will help you understand how to test the firmware version and update the firmware properly for your Huion products. Step one. Download the firmware tool Click on the link and download the firmware tool. Firmware Tool Or go to our official website Huion's support for the firmware's download and install this firmware tool. Step two. Install firmware tool - Click and install HuionFirmwareInstaller.exe after download. - Click Set Now after choosing the installation path. - Click the installation button is completed after the entire installation is complete. Step 3. Check the device's connection Open firmware tool once the installation is completed. If the page is undetected by the device displayed, please confirm that your device is connected properly. Step 4. Get a firmware update After connecting the device, the software will automatically identify the product model, its current version of the firmware, and check for firmware updates. If there are no updates, the software page calls no updates available. If an update is available, the Update button will appear on the software page. Step 5. Update firmware Click Update and follow the instructions on the page to complete the firmware update. Note: Some models require you to press the express key to reconnect the device: Once the device is properly connected, the software will automatically come up for your device. (Once the firmware is written, you need to reconnect the USB cable to use it) Additional note: Some specific models (H430P, H640P, H950P, H1060P, H610Pro V2) will be compatible with Android devices when their firmware has been updated to the latest version. (For any questions related to the tablet, please feel free to download and use the User's Guide) For a detailed introduction to Android mode, please refer to the answers to frequently asked questions about HS610/HS64 Phone Installation Mode should be done by the user with admin privileges on the computer. The first installation recommendation: don't connect a graphics tablet or pen display to your computer via USB before installing the driver. Recommendation to install an update: disable the graphics tablet or pen display USB cable from the computer, remove the existing driver and install a new one. For detailed instructions see click HUION download for drivers and page guides - a new window or tab will be opened. Finding help on the HUION support pages (the new window will be open). MAC OS X Mojave 10.14 User Problems, please read Relevant macOS Mojave (the new window will be open). E-service@huion.com info@huion-tablet.eu support: Are you looking for a driver for a Huion graphics drawing monitor or other Huion devices? If you don't know where to download and how to upgrade its driver, you've come to the right place! After reading this article, you should be able to state And upgrade the driver to your Huion device on your own easily and quickly! There's two methods for downloading and updating the driver for your HuionMethod 1 devices - Manually: You can download and upgrade the driver for your Huion graphics tablet or Huion Pan tablet monitor manually by stopping by the official Huion website. Then look for the last driver for the Huion tablet. Here's how to do it. Click here to visit the official Huion.On website at the top of the web page, click Driver.Move cursor on the model of your Huion device, and then click the Windows logo next to the driver: download its driver. Remove the downloaded .zip file. Then double-click the .exe file and follow the instructions on the screen to set its driver on the PC. If you're using this approach, be sure to choose a driver that's compatible with the exact model of your Huion device. OrMethod 2 - Automatically: If you don't have the time, patience or computer skills to download and update the driver for your Huion device manually, you can instead do so automatically with Driver Easy.You don't need to know exactly which system your computer is running, you don't need to risk downloading and installing the wrong driver, and you don't need to worry about installing the wrong driver, and you don't need to worry about installing the wrong driver. Easy driver handles it all. All drivers in Driver Easy come directly from the manufacturer. All of them are certified to be safe and secure. Download and install Driver Easy.Run Driver Easy and click Scan Now. The Easy driver will scan your computer and detect any driver problems. Click Update next to HUION HID to automatically download the correct version of your driver, then you can install it manually. Or click Update Everything to automatically download and install the correct version of all drivers that are missing or out of date in your system (This requires a Pro version - you will be asked to update when you click Update Everything, guarantees).
