Hello, I recently started playing KCD again because it was too buggy when released. I have huge problems in cities, getting huge drops of FPS from 70-80 to 20 and extreme stuttering (no freezing). Especially in Rattay it's almost to the point where I want to stop the game. It's only in cities though, everywhere it's fine, and the performance is ridiculously good. Yes, I Googled and searched for an answer a lot, but the problem is that most threads and solutions have been from early 2018; I still tried everything though. Maybe there are some new solutions/fixes I can try because it really bothers me. What I've done so far: - Got a stuttering and freezing mod fix from the nexusmods-textur streaming fix from Nexusmods-Used this program, which allows you to limit the use of the processor for certain programs (BES) - Basically tried everything from this post: Rig: Intel Core processor i5-4590i6 GB RAMMainboard MSI MSI MS-7918GPU NVIDIA GeForce GTX 1080Thanks in advance for any help, hurrah. Page 2 5 comments Freezes and Stutter fix is a mod for Kingdom Come: Liberation, created by Rinkanali. Description (in the author's own words): Just a small tool (BES) that limits the processor cores, prevents kcd loads of one of them up to 100%, which can lead to stuttering and micro-freezing. How to use: 1. Unpack the tool anywhere on the hard drive. 2. You run BES.exe. 3. Download your game. 4. Alt+Tab to BES and choose KingdomCome.exe process by clicking the Target button. 5. Click Limit this and install with a lower percentage slider -2% use, which means that your game can only take 98% of the processor power. 6. Minimize the tray tool. 7. Play the game and enjoy the freeze free gameplay :) Nbt: this tool also works with many other games where there are problems with processor overheating and high consumption. (!) Unfortunately you have to run BES everytime after the PC restart or if you closed it before completely. If you've used the limit/clock option and not just limit and keep THE BES running in the tray, it will remember your current game options and you can just download or restart the game at any time. But after rebooting or turning off your PC you have to run and set up BES again. It's not a big price to pay for stability, I believe. To avoid this, I made a simple BAT file as an autolauncher, which you have to adjust before using. How to do this: 1. Download AUTOlauncher from Extra Files and unpack anywhere on the hard drive. 2. Rightclick on file - pick ?hange and open it in a notepad. 3. Change directories as guided in a file (avoid using strange characters in directories). 4. You Run Steam client before using the completed bat. 5. If you use for the game general directories, such as Program Files, you should run the game as an administrator, run BES as an administrator too, in case. 4. If you're doing everything right - run the game with a bat file, it should work alongside the BES, which is starting to limit the limit (orange light in the tray). 5. Congratulations! Now you can always download your game with one click, without any additional manipulation. Known problems with this tool: FPS can fall a little in areas where you have had long freezes (cities mostly). If your KCD process is not visible on the tool list, run BES.exe as an administrator. An alternative known way to solve a freezing problem: If you don't want to use any tool, no matter what the reason is one. Fully download your game. 2. Tap Alt+Ctl+Delete to launch Task Manager. 3. Open Performance Tab. You'll see the use of processor cores in line with the history of CPU use. Look for one that takes 100% use (basic 1 for my i5-3570, for example). 4. Find the KingdomCome.exe process to find it: In Windows 7 - Open Tab Processes - In Windows 10 - Open Details tab. 5. Right click on KingdomCome.exe, select Set Proximity. 6. Untick our core with maximum use and click Ok and then tick back. 7. Close the task manager and get back to the game. 8. Now your cores will be balanced, but you have to do the process again every game run. NOTE: After playing 1hr with this method - I found it causes more FPS lags than during the use of BES. In cities my fps drops sometimes below 20 fps, while with BES it hasn't gone down by more than 30 fps (except dialogues). Im not knowing why this is happening. But I suppose the game isn't without a goal running around one core use, and a balanced core probably causes less stable performance. We need more feedback from users using this method. Update: Sunday, April 15, 2018 Genre: RPG File Size: 484 KB Report problems with downloading to page 2 Software included in this section is very useful in the daily application of your computer. It was divided into several categories, including: security (antivirus and firewall software, among others), system tools (improving Windows systems) and audio video (everything you need to play audio and video files on your computer). For gamers, this is a special category that contains software that is mandatory for players, such as GPU drivers, game console emulation software, and customers for a variety of digital distribution platforms (such as Steam, Uplay, and Origin). In the Software category, you can find utility software available for free (not for commercial use) that can improve your computer's performance in many ways. The software includes codec packages, must play all types of movies, communicators, internet browsers, apps for opening and/or editing audio files and video clips. Of course, the software tab also has programs for gamers. These include: driver packages, necessary to get most of the Radeon and GeForce GPUs, hardware platform emulators (virtual computers and consoles - both new and old), applications that improve your computer's performance in video games, tools for creating/changing games, software to customize controllers (such as gamepads) etc. Windows. are both free full versions (free software) and trials (shareware). Page 3 Here, you can legally download free games for your computer and laptop: full video games and free demos of the best titles around. We recommend the following titles: Euro Truck Simulator 2, Command s Conquer: Red Alert, Spider-Man 2: The Game, BeamNG drive, Need for Speed: Most Wanted (2005), Minecraft, Volvo: The Game, Postal 2, Command and Conquer: Tiberian Sun, Pro Evolution Soccer 2014.Our library currently contains 2010 files with full games and demos. Enjoy! Page 4 This site contains fashions, free game changes created by fans, and official additions for your favorite titles. These mods will make your game dough, add new mechanics, locations, characters and game modes. Our database contains 9,353 files with mods and game add-ons. This week's most popular fashions are: Grand Theft Auto: Vice City, Need for Speed: Most Wanted (2005), Grand Theft Auto V, Need for Speed: Underground 2, Command and Conquer: Red Alert 2 - Yuri's Revenge, Need for Speed Carbon, Grand Theft Auto IV, Gothic II: Night of the Raven, Gothic, Grand Theft Auto: San Andreas. Page 5 Here, you can find patches that will improve the performance of your games. Patches and updates are official updates created by game developers that fix bugs and introduce new gameplay features. Patches only work with original retail versions of the games. Our database contains 3,043 files with patches and updates. The most popular patches this week are: Agriculture Simulator 19, Agriculture Simulator 17, Euro Truck Simulator 2, Agriculture Simulator 15, Need for Speed: Most Wanted (2005), Grand Theft Auto IV, Gothic 3, Grand Theft Auto: Vice City, Incredible Hulk (2008), Mount Blade: Warband. Page 6 This section of our Downloads is dedicated to helping you complete really difficult games, or just to discover new features in gameplay. God's Mode, Invisibility, Immortality? We got it! Welcome to our collection of game coaches. Page 7 Coaches for Games, Names which begin with W. Most Popular Trainers: 7 Days to Die, 60 Seconds!, 7 Sins, 007 Legends, 112 Operator, 007: Bloodstone, 7554: Glorious Memories Revived, 25 To Life, 18 Wheels of Steel: Convoy, 4 Elements - A B D F G H J K L M N T T T Y X I seems to be stuttering when visiting Rattay and other cities. Has anyone found a solution to address stuttering? SSD fixed my stuttering, as in where the game freezes like a split second type of stuttering, there are different types of stuttering, I also get FPS drops where the game seems to be loading assets, then it stabilizes as soon as everything is loaded, cities need to optimize more on higher settings. Rattay can be bad at night with NPC and torches gets rough I'm just stuttering after the last patch. It used to be smooth, and now I'm in the middle of a stutter. Walking down the main street in Rattay is now terrible. 1 How this problem seems to relate Game overload 1 core processor. Here's a link to the thread on the couple that fixed the problem for me. I tried the CPU workaround without any real performance changes. The only other suggestion I have is Vsync off and use -heapsize command when running. vause I use is -heapsize 1524288 with a system that has 16G ram ... From everything I've read (and believe me, I've read about performance settings almost as much as I've been playing the game) heapsize to actually do nothing. Some people even say that a bunch of teams aren't working at all in cry-engineering games. the 24GB heapsize does nothing with my freezing. And all 4 kernels are loaded 100% when it happens (SirSopi Check, that the game is in runningFullscreen mode and see if it helps (you have to check it out anytime you tab out the game it will reset to limitess) I tried fullscreen ofc, but in full-screen mode the game freezes more. I have this question... On Rattay after the latest stuttering update, low FPS. There used to be glitches and now stuttering stuttering kingdom come deliverance freezes and stuttering fix
